

WIRE MANAGEMENT SCOOPS

COMPILE | PRODUCT SHEET

Compile is introducing a newly designed wire management scoop in the back of standard worksurfaces, effective May 1, 2021. Compile worksurfaces also offer an enhanced user experience with a standard 3/8" space behind the worksurface to provide effective management of power cords, cables, monitor arms and surface mounted power modules anywhere along the back edge.

FEATURES:

- Molded plastic inserts will be available in three finishes: Black (BLK), Silver (SIL), and White (DWT)
- Inserts will be factory installed on new worksurfaces
- Inserts snap in from the top and can be field replaced without removing the surface from the workstation
- Surfaces 24" - 54" wide will receive one Scoop, centered on the back edge of the worksurface
- Surfaces 60" wide and greater will receive two Scoops centered 19.5" from each corner
- Surfaces requiring original style contours will be available through our specials program, to match existing installations
